

**Amendments to the Specification**

Amend the paragraph beginning on page 6 at line 14 as follows:

The drive motor 28 is connected to one widthwise end of the turn signal lamp 10 to pivot the turn signal lamp 10 by a predetermined angle as occasion demands. The drive motor 28 has a first gear which is meshed with a second gear secured around a hinge shaft ~~[[32]]~~ 22 provided to the one widthwise end of the turn signal lamp 10. The pivoting angle of the turn signal lamp 10 is controlled by the motor control part 30.

Amend the paragraph beginning on page 7 at line 9 as follows:

Thereafter, as the driver further manipulates the lamp control part 32, as shown in FIG. 3, the illumination lamp 16 begins to emit ~~lights~~ light to offer a view to the blind spot, by which the driver can easily check the blind spot.
